SPACE SOLUTIONS

[www.abacusspace.co.za](http://www.abacusspace.co.za)

A partnership with Abacus Space Solutions for all your mobile classroom needs.

Every new school year sees an unexpected influx of children attending centralised schools. To help schools meet this challenge Abacus has for many years provided schools with additional classrooms for learners as schools are realising the benefits of mobile classrooms that are available on a rental basis.

The Abacus EzeeSpace classroom concept has been designed to create the optimum learning environment by using natural light and effective convection based air ventilation and insulation to moderate extremes in temperature. The quality, versatility and flexibility of the Abacus range of buildings enable us to provide speedy space solutions when additional classroom space is required. The mobile classrooms can be erected in a short time to welcome students for the new school term.

**Boardrooms** Ablutions  
**Tuck Shop** Kitchens  
**Library** Auditorium  
**School Hall** Multi Storey  
 Change Rooms Offices  
**Classrooms** Storage  
 Administrative Blocks  
 Laboratories  
 IT Rooms  
 Canteens

### Right first time with Abacus

Abacus proudly provides modular classrooms to thousands of students in the country on an annual basis.

Abacus has finished several turnkey school projects on behalf of a number of schools, which allowed them to concentrate on their core business: education for the future. These projects included the planning, civil work and the erection of all the buildings in line with very tight project timelines.

### Sturdy, speedy and safe solution

More and more schools are realising the benefits of mobile classrooms available on a rental basis.

The innovative design of the EzeeSpace modular units deliver a quality classroom environment that is wider, higher and larger than the standard cabin buildings. The sturdy steel frame ensures a robust building capable of accommodating any number of students.

The versatility of the EzeeSpace classroom allows us to offer several configurations. The standard classroom is a comfortable 54 square metres. However various other sizes are available. The flexibility of the modular units enables EzeeSpace solutions to be reconfigured to meet the school's changing needs.

The solid structure and quality finishes deliver an aesthetically pleasing building with a "permanent" feel.

### Abacus: a fully integrated solution

In line with the turnkey solution that Abacus offers, we can provide you with a fully integrate solution for site preparation and the supply and installation of all buildings. EzeeSpace for education is a tailor made solution that allows you to concentrate on your core business.
